ABOUT EUROPEAN CYTOGENOMICS CONFERENCES

The European Cytogenomics Conferences have attracted scientists from all the major cytogenomics laboratories in Europe and further afield since 1997. European Cytogenomics Conferences are organized biennially. More than five hundred delegates including key decision makers from all over Europe attend the European Cytogenomics Conferences organized in major cities of Europe. Delegates come to learn about the latest methods and results, and your company is invited to be a part of this learning experience. With a focus on modern methods in molecular and classical cytogenomics, ranging from molecular biology, array hybridization, microscopy, imaging, data analysis to bioinformatics, this is the essential conference to showcase your company to this highly influential audience.

DELEGATES PROFILE

The conference is meant for anyone working in human, animal or plant cytogenomics. The majority of the delegates work in clinical diagnostic laboratories for postnatal, prenatal and tumor cytogenomics.

Expected Number of Participants: 500
